Internship

Hasol Energy

Jun 2025 - Aug 2025

Product Designer

Hyderabad

- Developed detailed **3D CAD models** using Fusion 360 and Autodesk Inventor and performed **structural and stress analysis** to evaluate strength, durability, and safety.
- Assisted the engineering team during the **prototype development phase** and supported design iterations to improve functionality and feasibility.
- Ensured designs aligned with company standards and project objectives and contributed to streamlining the **prototyping workflow** for faster development
- Gained hands-on experience in **professional CAD modelling and assembly design** and developed strong knowledge of **structural and stress analysis techniques**. Also, improved understanding of **real-world engineering constraints**.

Freelancing

Freelance 3D & Graphic Designer

Completed freelance projects involving 3D CAD modeling, poster design, and packaging design. Collaborated with clients to understand project needs and produced creative, technically accurate, and market-ready designs.

Projects

Dual chamber Temperature controll bottle

Feb 2024-April 2024

Product Designer

Designed a dual-chamber bottle with separate hot (vacuum-insulated) and cold compartments. Integrated a mechanical cap system to control and mix both liquids on demand, allowing users to dispense a balanced, customized drinking temperature.

Multi-Purpose Modular Kitchen Appliance

January 20 th

Product Designer

Designing and developing an innovative modular kitchen appliance system that consolidates 6+ motorized kitchen tools (mixer, juicer, grinder, chopper, egg beater, hand blender) into a single product with interchangeable attachments powered by a universal motor base.

Standing Urban Transit Concept | Transportation Design Project

Product Designer

Designed a compact urban transit vehicle optimized for high passenger capacity, integrating standing-support safety systems. Developed the exterior and interior using user research and ergonomics, and created detailed 3D models and visualizations.

Skills

Domain Skills User Research & Ethnography, Design Research & Trend Analysis, Human-Centered Design, Cost & Feasibility Analysis, UX intensive approach

Technical Skills CAD Modeling (Fusion 360, SolidWorks, AutoCAD), 3D Modeling & Rendering (Blender, KeyShot), Prototyping & Model Making, UI/UX Design (Figma, Adobe XD), Materials & Manufacturing Knowledge

Soft Skills Problem Solving, Design Thinking & Innovation, Communication Skills, Time & Project Management, Leadership

Certification

Smart India Hackathon Finalist by AICTE

2025

Product Designer and CAD expert

St.Josephs Engineering College

Selected as a finalist in the Smart India Hackathon from a highly competitive national selection. Contributed to developing innovative agricultural machinery solutions through research, concept development, and technical problem-solving in a multidisciplinary team.

India Design Week byAutodesk

30 April 2025

Selected as a finalist for the Autodesk India Design Week Hackathon (30th April), competing in a CAD-based challenge that tested advanced modeling, problem-solving, and Autodesk software proficiency under time constraints.

Education

The Springs International School

2019 - 2020

Secondary 80.2%

Nilambur Malappuram, Kerala

MTHSS chungathara

2021 - 2022

Higher Secondary 83.3%

Nilambur, Chungathara, Kerala

Lovely Professional University

2023 - Present

B.Design (Product and Industrial) 7.76 CGPA

Phagwara, Punjab
